

## SOOT OUT OF UNCLE SAM CON.

David Evans' Stock Goes to C. E. Allen and Others.

## EAGLE & BLUE BELL ANNUAL

HARRY JOSEPH SAYS CARISA IS A BIG MINE.

Yesterday David Evans sold his remaining holdings in the Uncle Sam, believed to have amounted to somewhere between 10,000 and 15,000 shares, to C. E. Allen and another gentleman who joined him in the purchase, at a reported price of \$1.50 per share, and the vendors' resignation as a director is now in the hands of the secretary. It was stated yesterday that Mr. Allen had been joined by James Chipman in handling the stock, but such was not the case. Mr. Chipman having had no hand in the deal. It is expected, however, that Mr. Allen will be asked to accept the position of board member vacant by Mr. Evans' withdrawal, and action will most likely be taken to elect him.

Now that the holdings of Mr. Evans, that originally amounted to 119,000 shares, have been entirely absorbed, a much firmer tone is expected to develop in the shares of that company, as this stock has been coming upon the market for some time. The control now rests with Messrs. James Chipman, John Dorn and one or two others, and the fact that the former has been a heavy purchaser for some time past shows that he is satisfied with his investment. That he has gathered about him a combination of stayers is also a fact, and is likely to stimulate confidence and stop the hammering that Uncle Sam has been subjected to.

## EXAMINED THE CARISA.

H. S. Joseph Reports on Conditions in the Mine.

H. S. Joseph returned yesterday from an inspection of the Carisa mine. He applied to superintendent Underwood for permission to go through. Friday morning and was extended every courtesy. He returned a firm believer in Carisa and called it a practically perfect mine as he found them.

The main workings of the mine are on the 250-foot level, but Mr. Joseph said a wing had sunk thirty-five feet below that, where a drift had been sent out ninety-two feet through a body of ore that for evenly distributed values was the best he had ever seen in the Tintic district. Cross-cuts at various points along the drift showed that the chute was more than twenty-four feet wide on an average and from numerous samples, taken with a view of getting an approximate idea of the value of the mass, he yesterday afternoon got returns of 2.8 ounces in silver and 6 per cent copper. Taking into account the showing in the drift from the wing and the development on and above the 250-foot level, and allowing that all the ore will not average over 35 per cent. Mr. Joseph said he was able to compute a tonnage actually in sight that was ready for breaking down that contained values exceeding \$750,000. "And that," said he, "does not take into account all the three to four feet of fine copper ore recently opened up in the northern spy portion of the company's territory, and neither does it include the 300 feet below the present workings, and the great point where report has it that the ore chute passes out through the end lines into the Victor."

Mr. Joseph was highly pleased at the wide-open manner in which the mine is run and says it is a pity that every mine management does not make it an object to let the investing public learn from the mines themselves what they have in sight on which to place a value for their shares. He declares there would be fewer "pump" movements if such were the case.

## EAGLE & BLUE BELL TUNNEL.

Ran Behind Last Year, But Will Do Better Next.

At the annual meeting of the Eagle & Blue Bell company yesterday Secretary and Treasurer W. R. Wallace submitted a report showing that the company had run behind during the past twelve months \$4,321.42. Counting the indebtedness that was outstanding a year ago, the company now owes \$15,808.39. This sum will be cut down more than \$1,000 when the three cars of ore now on the market are settled for. It cost to run the mine during the year \$15,350.50 and \$7,576.38 worth of ore was sold, while \$1,070 was realized from the sale of treasury stock, making the total receipts \$8,465.53.

While the company's indebtedness looks rather large at \$15,808, there is still 6,750 shares of stock in the treasury that has a present market value of over \$1 per share, so that the company's real indebtedness is not more than \$9,000.

During the year a new level below the tunnel, which has been opened, has been very fine ore has been struck. For the past month or two the production has more than paid the expenses of operating and the outlook was never so bright as it is now.

The election resulted in returning the old board and officers as follows: Sara A. McChrystal, president; J. H. McChrystal, vice president; W. R. Wallace, secretary and treasurer; these, with J. C. and A. H. McChrystal completing the board.

## BEAVER COUNTY BUDGET.

O. K. Piling Up Ore—Chances For Capital.

J. M. Howell, the well-known miner and prospector of Tintic, is up from that camp with a budget of news. He says both Milford and Frisco are livelier than they have been in many years.

The O. K., Mr. Howell says, is developing into the most wonderful mine. There is now an immense pile of ore on the dump that he feels sure will exceed in value that rich railroad sent up the latter part of August—ore that is accumulating through the plan of development being carried out. Whether it will be shipped or not he did not know, but he presumed it would not be touched before Manager Lewis returned from the east.

The gentleman owns a valuable group of five claims in Star district, but he says lack of money prevents him from bringing them to the front. A vein six and one-half feet wide has been opened that carries ore running 15 per cent lead, eighteen ounces silver and over \$7 per ton in gold. It is located between the Burning Moscov and Hoosier Boy. He also owns good ground in Elephant canyon, six or seven miles west of Milford, ground that he has worked for 25 years, and which shows up well. William Williams also has a valuable silver-lead proposition in his Easy William group in the same neighborhood as the Burning Moscov, but like himself, he is unable to bring it out for lack of means.

The same is true concerning James Barratt and a fine copper property that he owns south of the Burning Moscov. "Much good work has been done on our section during the past year by A. R. Lewis and others," said Mr. Howell, "and everybody down here appreciates it. But there is lots of more splendid

ground that only needs the magic touch of capital to bring it out, and we are all hoping to see the day when we can show money men what we have here."

Mr. Howell spoke most enthusiastically of the Copper Ranch property, and gave it as his opinion that it would prove to be one of the greatest mines in that section some day. He will go back the first of next week.

## SNYDER AFTER ZINC ORE.

Hell-hole to be Exploited—East-Strike in the Dalton.

Richfield, Oct. 4.—James Greaves and James E. Beveridge, in the interest of Willard Snyder and others, went up Monroe canyon a few days ago to locate a zinc proposition, but found the property in possession of others. The ore was discovered some time ago and lately coming to the attention of Mr. Snyder he decided to take hold of it. It is located about three miles above the mouth of the canyon, and the body of the ore which can be traced for a mile or more, and is said to run up as high as 15 per cent in zinc.

Mr. Snyder's attention has been directed toward the Black Knolls, west of Sigurd, during the past two weeks. A very rich copper ore has been found there, some of it going as high as 45 per cent, and a number of parties have located claims.

Mr. Snyder and E. V. Harlowe, R. C. Harlowe and their sister, Mrs. Taylor, all of Boston, and J. P. Bower of Hagerstown, Md., have started here, after a three weeks' stay here. The gentlemen are interested in the Spanish mines at Hell-hole and are also the officers of the Utah Development company, which is promoting another mining proposition in that vicinity. It is their intention to bring the Hell-hole to the attention of eastern capitalists in a way that will result in extensive developments being inaugurated next spring.

## WEST MORNING GLORY.

Manager Smith Started Men to Breaking Ore Yesterday.

Notwithstanding the fact that there is neither a hoist nor a building over the shaft at the West Morning Glory, Manager Smith yesterday started men to work stopping ore on the 250-foot level. On his return from camp he stated that the shaft had been sufficiently repaired at the surface to permit the use of a hoist and store the ore in the unused drift until such time as the new hoist arrives from Denver and is installed. No attempt will be made to do anything on the 300-foot level at this time. Mr. Smith says the new buildings will be rushed up just as rapidly as possible, and he hopes to see everything finished by the end of the month, though crowding will be necessary to accomplish it that soon.

## FAVORABLE LEASE AND BOND.

Thomas Black Gets It On an Old Bingham Property.

A bond and lease from Thomas Marshall and W. E. Smedley to Thomas Black for the Bemia and Hini, Idaho, in Black Jack gulch, south of Bingham canyon, was filed for record yesterday. By the terms of the contract the lessors grant the privilege to the lessee to operate the property in the manner usually designated in mining leases, and pledges added thereto, provided the lessee pays the sum of \$2,000 on July 1, 1902, and the company must pay \$8,000 within the year following, and all royalties are to apply on the payments to take up the bond.

## NICE ORE FROM SILVER CITY.

Harry Elmer Ships It From the Old Joe Daley.

Harry Elmer was in the market yesterday with a carload of ore from the old Joe Daley, a part of the Undine group at Silver City. It was sold on controls showing 5.2 per cent lead, 112 ounces silver, 5 per cent copper and \$1 in gold per ton, the consignment netting \$53,533 per ton. He promised some more of the same kind in the near future, as good ore is now exposed in several places.

## BOISE MINING EXCHANGE.

Mass Meeting Last Night Took Favorable Action.

(Special to The Herald.)  
Boise, Oct. 5.—The plan to establish a mining exchange here is being favorably received. Governor Hunt, as chairman of the mass meeting, has appointed a committee to take definite action.

## Tintic Shipments.

The shipments from the district for the past week, according to the Tintic Miner, were as follows:

	Cars of Ore.
Carisa	10
Eagle & Blue Bell	1
Elmer & Beaman (West Tintic)	1
Gemini	2
Grand Central	2
Mammoth	2
May Day	5
Star Consolidated	3
Tintic	2
Uncle Sam Consolidated	5
Yankee Consolidated	5
Total	56
	Cars.
Tesora	3

## To Operate in City Creek.

Henry S. Buckwalter and associates are planning to resume work on a group of claims located by them several years ago at the head of City Creek canyon. They have obtained encouraging assays in gold and copper from the claims, in one of which are indications that the property was operated many years ago in a crude way, probably by Spaniards.

## Ore and Bullion.

Ore and bullion settlements in this city during the past week amounted to \$473,800, yesterday's proportion of that sum being \$35,700, as follows:

T. R. Jones & Co., ores, \$12,700; bullion, \$11,000.

McCormick & Co., ores, \$7,000; gold bars, \$5,700.

## Metal Market.

Silver, 57 1/2 per ounce.  
Copper, 15 1/2 per pound.  
Lead, A. & C. price, \$3.90;  
New York exchange, \$4.37 1/2.

## Mining Notes.

Five cars of Yankee ore will reach the samplers tomorrow.  
A car of South Swansea ore will be on the market tomorrow.

W. F. Snyder is scheduled for a trip to the Boss Tweed today.

The Conklin sampler was yesterday in receipt of three cars of ore from Tintic.

David Evans will leave today for a two weeks' round-up of the Tonopah gold camp.

Five cars of Uncle Sam ore were released from the sampler yesterday, and will be sold tomorrow.

George Somerville had a car of ore on yesterday's market from the Wild Dutchman of American Fork district. The Taylor & Brunton sampler was

yesterday in receipt of eight cars of ore from Tintic, two from Bingham, two from Frisco and one from American Fork.

Manager Weir having pretty thoroughly cleared his table of accumulated correspondence and attended to other matters that required prompt attention on his arrival, he will leave for the Ajax tomorrow morning.

J. Farrington McCree, who is directing operations at the Blackbird company's property in Lombl county, Idaho, came down from the north yesterday for a consultation with Manager Franklin. He says the company's mines are opening up splendidly.

Manager Packard will have three cars of ore from the Star Con. on the market tomorrow. It is of a character that he has never heretofore attempted to ship, and if he finds that it can be handled at a fair profit, the Star will be sending out lots of it very shortly.

Tintic Miner: The Gemini mine closed down Monday. The shaft is being cabled and retimbered. Work will be resumed with a full complement of men the sooner as the shaft can be handled at a fair profit, the Star will be sending out lots of it very shortly.

M. L. Effinger, secretary of the Ophir Gold Mining company, left for State line last night. He is on his way to Salt Lake through the property. Among them were R. W. Sloan, E. W. Griffiths, J. T. Goodwin and E. W. McCreary. The party will likely return on Monday night.

Samuel Newhouse, the well known operator who is so largely interested in Bingham, came to Denver Friday, and took the night train for Frisco, Beaver county, where he went to examine the Royal company's property, a proposition in which he became heavily interested early in the year.

S. W. Mosby came in from the May Day mill yesterday and will remain until investor Wood's arrival from San Francisco on Monday, when they will return to camp together. Mr. Mosby says the mill is behaving very nicely, though it has been made to its capacity as yet. It will not be thrown wide open until Mr. Wood gives the word himself.

His recent trip into the Howe Sound country, British Columbia, James W. Neill, who went up to examine and report on the great Britannia property, joined others in the acquisition under a five-year bond of another big copper mine in that section. It is equipped with a seventy-ton smelter, has produced nearly \$1,000,000, and Mr. Neill says he and his associates stand to make some good money out of it. The terms of the bond are such that it is not possible to lose, whether the property turns out as expected or not.

## FAST TRAIN TO OGDEN.

Oct. 5-6-7.

Daily until Oct. 7th, inclusive, the Rio Grande runs an extra train to Ogden at 5:30 p. m. Other Ogden trains depart daily at 9:50 a. m., 1:00 p. m. and 11:00 p. m.

## THOUGHT HE WAS GUILTY.

Novel Entry in Bluffdale Magistrate's Records.

Louis Nepogee was found guilty before Justice Turnet at Bluffdale yesterday of the offense of having on Sept. 21 unlawfully taken eleven head of livestock from the possession of C. W. Scott, who had detained the animals until damages were paid for their trespass into the orchard of Herbert Bros. At the conclusion of the trial the justice said: "Well, I think the fellow is guilty and I'll fine him \$20 and costs." This effect of the remark was carried into the record as the court's judgment. Assistant County Attorney Loofboon prosecuted the case and Attorney C. W. Boyd defended Nepogee. None of any deal was given by defendant's attorney.

## DENIED BY MRS. DUDLEY.

Says She Had Nothing to Do With Her Husband's Divorce.

Mrs. M. A. Dudley denies the statement contained in a letter from Attorney Loomis, Fremont, Neb., to Attorney City of this city that the Mrs. Dudley obtained a divorce because of her husband's attentions to the present Mrs. Dudley.

"The divorce was granted on other grounds, in which I was entirely unopposed," said Mrs. Dudley yesterday. "This will in question, and I have been destroyed, as the attorney who held it wrote as much to my husband in answer to an inquiry for it some years ago."

## "Doris" Has Arrived.

Our \$3.50 shoes for women. Walker's Store.

## Scandinavian Statesman Dead.

Christiania, Oct. 5.—Former Premier Silbrøn is dead.

## A DETERMINED WOMAN.

Finally Found a Food That Cured Her.

"When I first read of the remarkable effects of Grape-Nuts food, I determined to secure some," says Mrs. C. W. Aldridge of Salt Lake, Mo. "At that time there was none kept in this town, but my husband ordered some from a Chicago traveler.

"I had been greatly afflicted with sudden attacks of cramps, nausea and vomiting. Tried all sorts of remedies and physicians, but obtained only temporary relief. As soon as I began to use the new food the cramps disappeared and have never reappeared.

"My old attacks of sick stomach were a little less violent, but by continuing the food that trouble has disappeared entirely. I am today perfectly well, can eat anything and everything I wish, without paying the penalty that I used to. We could not, and would not, keep house without Grape-Nuts."

My husband was so delighted with the benefits I received that he has been recommending Grape-Nuts to his customers and has built up a very large trade on the food. He sells them by the case to most of the leading physicians of the county, who prescribe Grape-Nuts very generally. There is some satisfaction in knowing that a really scientifically prepared food."

## LIQUIDATION AND LOW PRICES.

Week Closed With a Panic Narrowly Averted.

## BUSINESS WAS VERY HEAVY

SALES REACHED 499,292 SHARES AND \$495,424.65.

The week on the mining exchange closed yesterday with the sale of 43,712 shares of stock for \$62,530. The record for the six days was 499,292 shares and \$495,424.65.

Monday witnessed the largest day's business in a long time and with one or two exceptions prices were fairly steady and strong, but that condition of affairs was not to last. Commencing Tuesday a weakening was noticeable and from then until yesterday prices took a tumble that it is a matter for congratulation all around that a genuine panic was averted. A slight change for the better was apparent in the tone of the market Friday afternoon and yesterday's trading inspired the talent to predict that bottom had been reached.

The chief feature of the slump was in the fact that the stocks receiving the hardest blows were those that least deserved the treatment.

Ajax, which began at \$1.44, was at the mercy of the bears right up to the close of business yesterday, and a decline of nearly 4 cents a share resulted, the closing sale having been made at \$1.44.

Carisa opened at \$1.41 and yesterday it touched \$1.19, recovering a little at the close. Its record was made in the teeth of the declaration of its initial dividend, a strong surplus and splendid reports from the mine.

Consolidated Mercier, with its production of \$100,000 in gold per month and its regular dividends of 12 1/2 cents per quarter, was hammered from \$2.48 to \$2.28.

Daily-West, that sold Monday at \$3.80, was knocked to \$3.50 on Friday, when the directors met and declared a dividend of 40 cents a share and made a statement concerning the condition of the mine and the company's treasury that was most reassuring. The result was that it went up to \$3.88 yesterday, closing 10 cents under that figure.

Lower Mammoth dropped from \$2.95 to \$2.37 and rallied somewhat yesterday, closing at \$2.52 1/2. Mammoth, though rather inactive, sold as low as \$1.68 and closed at \$1.66 bid, on reports that dividends were likely to be passed for some time.

May Day, which sold as high as \$1.48 on Monday, started down the toboggan and was never headed off. It was reached yesterday. From there it rose to \$1.21 and afterwards eased off and closed at \$1.15 1/2.

Tesora fluctuated and was up and down between 60 cents and 70 cents nearly all week, closing at 62 cents.

Eagle & Blue Bell dropped from \$1.29 to \$1.05, but found some force at the close. It was one of the most stable in the list during the shaking up.

Uncle Sam also received an awful drubbing. Monday it sold as high as \$1.74. On Thursday it touched \$1.24 and began to recover. It opened at \$1.40 yesterday morning and passed the sensation of the day. It rose almost immediately to \$1.45 and then a scramble among the "shorts" to cover ensued and the price climbed to \$1.57 1/2.

2 1/2 cents lower. The change of management and declaration of the second dividend coupled with the fact that the property is to increase its output, most likely accounted for the advance.

Victor, Boss Tweed, Ben Butler, Tetra and Consolidated weathered the storm in good shape, when an effort to knock Yankee was promptly headed off by Dr. Franklin getting into the buying ring.

The day and week closed on the following record of sales and final quotations:

	Bid.	Asked.
Ajax	\$1.15	\$1.15 1/2
Albion	1.00	1.05
Alice	1.00	1.05
Black Jack	1.50	1.55
Ben Butler	1.00	1.05
Boss Tweed	1.45	1.50
Bullion-Beck	2.50	2.55
Consolidated Mercier	2.25	2.30
Carisa	1.19 1/2	1.19 3/4
Century	1.15	1.20
Dailton & Lark	1.00	1.05
Daily-West	1.21	1.24
Dexter Consolidated	1.40	1.45
Dailton	1.00	1.05
